DETAILED ACTION

Acknowledgements

The Applicants amendment filed on April 9, 2007 is acknowledged, Claims 19-30 remain pending .

Response to Arguments

The Applicant's arguments filed on April 9, 2007 have been fully considered The
The amended claims a rejected in view of 35 USC 112

See following rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim19-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 19,20,21,23-30 disclose "a playback unit", however the claim language states "image produced by multiple playback units, it is unclear how one playback unit can be enabled to be multiple playback units..

Claim Rejections - 35 USC § 103

Art Unit: 3621

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19,20,21,23-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rhoads, (US Patent No 6,363,159) in view of Saito (US Patent 6,182,218) and further in view of Chaum (US Patent 5,959,717).

As per claim 19,

Rhoads ('159) discloses a playback unit, comprising:

an input for receiving an encoded data stream bearing a video image;

(Figures 2 and 3)

Rhoads ('159) does not explicitly disclose "a decoder for decoding the encoded data stream;". Saito ('218) discloses "a decoder for decoding the encoded data stream; ,(Figure 1, column 8, lines 15-18). It would be obvious to one of ordinary skill in the art at the time of the invention to combine the Rhoads ('159)'s method with Saito's teaching in order to enforce digital rights management systems.

Rhoads ('159) does not explicitly disclose " means for imparting a prescribed transformation to the video image for warping the video image in a manner, and by an amount, not readily visible to a viewer such that a composite video image produced by multiple video playback units will be distorted and the distortion of the composite video image can be seen by the viewer, wherein said warping changes with time during playback of the video image ".

Chaum ('717) discloses "means for imparting a prescribed transformation to the video image for

Art Unit: 3621

warping the video image in a manner, and by an amount, not readily visible to a viewer such that a composite video image produced by multiple video playback units will be distorted and the distortion of the composite video image can be seen by the viewer, wherein said warping changes with time during playback of the video image”(Column 8, lines 57-67 – column 9 lines 1-9). It would be obvious to one of ordinary skill in the art at the time of the invention to combine the Rhoads ('159)'s method with Chaum ('717) teaching in order to enforce digital rights management systems.

Claims 20,21 and 23-30 are in parallel with claim 19 and are rejected for at least the same reasons.

Allowable Subject Matter

Claims 22 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and the rejection under 35 USC 112..
